LEGEND: All columns are NOT NULL unless the type says NULL.
Same-tree rule (composite FKs): relationship (member1_id/member2_id, tree_id),
suggest_request (target_member_id, tree_id) -> family_member(id, tree_id);
tree_collaborator (invitation_id, tree_id) -> invitation(id, tree_id)
Invitation links are reusable until revoked or expired. Deleting a tree cascades to all its rows.
